[1]Test Conditions: 2,000ppm Lactose solution at 110psi (760kPa) operating pressure, 77°F (25°C)
[2]Test Conditions: 2,000ppm MgSO4 solution at 110psi (760kPa) operating pressure, 77°F (25°C)
[3]Test Conditions: 2,000ppm NaCl solution at 110psi (760kPa) operating pressure, 77°F (25°C)

COMMON APPLICATIONS

- *Demineralization & concentration of lactose*
- *Dye & optical brightening agent concentration*
- *Seawater sulfate removal*

NF SERIES BENEFITS

- *Competitive flux as the current industry standard NF membranes*
- *Excellent MgSO4 and lactose rejection*
- *Operate at lower pressures than Reverse Osmosis membranes and still achieve excellent rejection of divalent and multivalent ions*
- *NF membranes greatly reduce levels of hardness, nitrates, sulfates, tannins, turbidity, color, TDS, and moderate levels of salt from feed water streams*

TECHNICAL NOTES

For element sizes not listed, please call or email Synder Filtration for details. We can design an element to fit your exact needs – just specify the element outer diameter (OD) or vessel/housing inner diameter (ID), element inner diameter (ID), and length. Elements are also available with or without a controlled bypass tail. Additional feed spacers are also available.

Trials should be conducted to determine optimal application conditions.
